

Application

Application is compatible with L Series Hardware. This application can control up to 12 irrigation zones per controller with the ability to attach multiple zone controllers for additional irrigation coverage. Built in soil moisture handling, individual irrigation zone run times and emergency shutdown features.

The Free OPIX Now!™ NetBuilder and Commissioning Tool provides a graphical user interface for configuration and monitoring. This simplifies hardware I/O customization, communication parameters, control sequences. The Plug-in can be launched/executed from-within a network management tool such as LonMaker for Windows or similar.

Software Features

- Up to 12 independent irrigation zones per controller
- Soil moisture level input using of the shelf sensors
- External or network emergency shutdown capability
- Changeable network variable types.
- Slave mode for any unused I/O, which can be bound to another controller.
- Independent irrigation timers per zone.
- Universal inputs capable of external sensors / switches to halt watering.
- Chained watering to assure that irrigation happens one zone at the time among all controllers (if desired).
